SUBSEA BOTTLES AND JUNCTION BOXES

DESCRIPTION

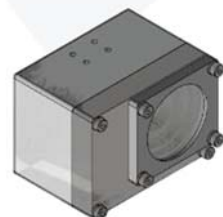

Seadraulics design and fabricate custom subsea bottles and custom subsea junction boxes. We supply and test a range of Subsea One Atmosphere pressure housings and Oil filled subsea Junction Boxes.

Furthermore, depth rating and pressure testing, up to 3000 meters, can be completed within the in-house pressure chamber.

Subsea Bottles / Housings and custom subsea Junction boxes can be either supplied as machined parts or can be fully populated with subsea connectors and fully wired as per client specs. Interconnecting cable assemblies can be procured from Seatronics global bases. Those can be delivered directly to the end customer with short lead times.

FEATURES

- Custom design
- Bottle skin only
- Bottle complete with connectors internal racking
- Internal wiring, PCB / power supply design and supply
- Pressure testing to 5000 psi
- 3D design using industry leading applications, quick lead times.
- Subsea bottles can be supplied with acrylic or sapphire view ports.
- Suitable for cameras or laser systems.
