

**Seadraulics**  
Subsea Fluid Mechanics

## TYPE B SINGLE PORT HOT STAB—API 17H 10K PSI

### FEATURES

- High Flow – Low Pressure Drop
- 10,000 psi High Flow Single Port
- API 17H Type 1 standard
- Low mating force
- Multiple Handle Options
- 1/2" NPT Port Size
- Duplex Stainless 2205 or Super Duplex Stainless 2507

### DESCRIPTION

Seadraulics offers various types of Hot Stabs and Receptacles which are essential components for subsea operations, facilitating hydraulic tool operation, fluid transfer, chemical injections, and pressure monitoring. Engineered for minimal environmental impact, they ensure efficient fluid transfer with minimal leaks.

Compliant with ISO 13628-8 or API 17H standards, these versatile units can be customized to accommodate various port configurations, meeting specific application needs effectively and reliably.
